

Terrington consistently delivers innovative, proven, scalable software systems which enable large global – and small single-site - operations to collect and manage data far more efficiently. Our solutions facilitate compliance and help businesses implement process improvements which enhance efficiency, communication and profitability.

TRANSFORM - ONE PRODUCT, MANY APPLICATIONS

In today's tough business environment wasted time through poor data management means lost productivity.

Transform can revolutionise your data capture, inspection and verification to simultaneously meet regulatory and operational requirements, whatever your business, wherever you are.

The Transform package is **scalable** from a single installation to a global solution that ensures consistency of process data and shared information across the whole organisation, reducing reporting time, **saving costs** and fostering the **one business vision**.

You can **access** crucial business processes **data**, wherever you are, whatever the time, through an internet browser with customised views delivering key information to support your role and decision making.

Transform users around the world **save vital time** and **improve** staff **productivity** to generate more than **30% efficiencies**. One user enjoys a **67%** operational time-saving and avoids bigger employment cost.

Terrington products combine traditional 'off-the-shelf' benefits with the flexibility and scalability of bespoke solutions at prices which deliver **fast returns on investment**.

All our software has a **full warranty** and a range of after-sales support and upgrade packages designed to support your business development.

Terrington products evolve to reflect and implement proven technological advances to protect and **add value** to our customers' information technology and infrastructure investment.

Every day our products meet a wide range of data management challenges across the industrial and commercial spectrum. In every case we have delivered software solutions - **on time** and **within budget** - bringing our customers immediate benefits.

Terrington also offers a full range of requirement capture, design, systems integration, hardware procurement, installation and commissioning, systems architecture and after-sales support.

QUALITY ASSURED

Terrington is approved to ISO9001:2000 and ISO9001-3/TickIT for software development and is also registered and approved to BS7799:2002, Information Security Management standard ensuring the integrity of customer information and continuity of the business.

Terrington products are validated by recognised independent third parties in both use and procurement evaluation exercises.

proven solutions
for creating time in a busy commercial world

"I have no qualms in recommending Terrington for both its product and technical support."

Alan Muir, British Energy

"Transform has given us greater control over scaffolding contracts and HSE critical tasks associated with plant turnarounds, whilst also delivering real efficiency gains."

Alex Curry, BP Chemicals

"Terrington has worked closely with us to develop a system for computerising routine laboratory data, enabling us to move towards a paperless laboratory."

Jeremy Cook, York Bioanalytical Solutions

"Significant quality improvements and elimination of data entry errors coupled with excellent service..."

Gregg Imrie, York Bioanalytical Solutions

Terrington Devising the solution, delivering the promise
